

MUHAMMAD HAMZA

Automation & Manual SQA Engineer | Selenium, Cypress, Playwright, API Testing

Islamabad, Pakistan | +92 303 985 4053 | hamzaicp54@gmail.com | linkedin.com/in/MHamza-SQA | github.com/hamzaSqa847

PROFESSIONAL SUMMARY

Automation-focused QA Engineer with 4 years of hands-on experience in web, mobile, and API testing. Skilled in designing and executing automated test suites using Selenium, Cypress, and Playwright, integrating tests into CI/CD pipelines, and reducing regression cycle time. Experienced in Agile delivery with distributed international teams, API testing (Postman, JMeter, Newman), and defect management from test design through production release. Proven ability to improve release quality by catching critical defects early.

KEY ACHIEVEMENTS

- Automated end-to-end regression suites with Selenium and Cypress, cutting manual regression time and accelerating release cycles.
- Built and integrated automated UI and API test suites into CI/CD pipelines, enabling faster, more reliable deployments.
- Identified and reported critical defects prior to production release across web, mobile, and AI chatbot applications.

TECHNICAL SKILLS

Automation & Testing: Selenium, Cypress, Playwright, Postman, JMeter

Testing Types: Manual, Automation, API, Regression, Smoke, System, Performance

Programming: Python, JavaScript, Node.js

DevOps & Tools: CI/CD, Docker, GitHub, GitLab, Bitbucket, Azure DevOps

Project & Test Management: JIRA, TestRail, Trello, Notion, Asana

PROFESSIONAL EXPERIENCE

Software QA Tester | Digital Tolk (Remote, Sweden-based)

Jul 2024 – Oct 2025

- Performed manual and automated testing across web, mobile, and AI chatbot applications, ensuring consistent quality across platforms.
- Designed and executed test cases for system, regression, API, and performance testing, improving test traceability and coverage.
- Automated recurring regression scenarios, reducing manual testing effort and shortening release cycles.
- Collaborated with international, distributed teams in Agile sprints to ensure release readiness and on-time delivery.

Software QA Engineer | Cloud Mesh Solutions (Onsite, Islamabad — Swiss-based)

Nov 2022 – Jul 2024

- Conducted automation and manual testing for e-commerce platforms and mobile applications, safeguarding release quality.
- Built and maintained automated test scripts using Selenium and Cypress, reducing regression cycle time and manual effort.
- Partnered closely with developers and product owners to triage defects and improve overall product quality.

Software QA Engineer | QuellxCode Pvt Ltd (Onsite)

Apr 2022 – Sep 2022

- Executed integration, system, and smoke testing for web and mobile applications, validating functionality against requirements.
- Performed API validation using Postman, verifying request/response accuracy and backend behavior.
- Delivered detailed QA reports that enabled early detection of critical defects before release.

PROJECTS (PORTFOLIO HIGHLIGHTS)

Automation Testing Framework (Playwright / Cypress)

- Built reusable automation scripts for UI and API testing, integrated into a CI/CD pipeline with structured reporting for defect analysis.

API Testing Suite (Postman + Newman)

- Designed and automated API test collections to validate backend performance and response accuracy, runnable via CI/CD.

EDUCATION & CERTIFICATIONS

MS Computer Science — Muslim Youth University (In Progress)

BS Software Engineering — Islamia College University (2017 – 2021)

Certifications: Selenium WebDriver | Cypress Automation | SQL & NoSQL | Python for Testing

Languages: English (Fluent) | Urdu (Native) | Pashto (Conversational)
